

Mom's Making a Difference Naturally

RUTHANNE AND HEATHER MET EACH OTHER IN

the summer on 1989 while working together at Whistlin' Jack Lodge on Chinook pass. When they graduated from high school, Ruthanne moved to Delaware to be a live in Nanny while Heather stayed home and went to the local college in Yakima.

They stayed in touch throughout the year and began making plans to move to Spokane and go to Moody Bible College in the summer of 1996. They were roommates for over a year while going to school and working in the same restaurant. They both met their husbands and both got married in 1998.

The phone calls to each other never ceased. They talked of marriage, children, church and life. In July of 2006, Ruthanne was looking for a part time job to pay for family vacations. After many applications and a couple of interviews, she came up with nothing. She decided that she would clean a couple of homes a week to compensate and called Heather with her idea. Heather was so excited for

the idea and told her that she would love to join her in this adventure. Heather told Ruthanne they needed to use all natural cleaning products while Ruthanne was telling Heather of the turndown bed service, truffles and lavender.

August 1, 2006, Maid Naturally came together! They cleaned a couple of days a week and soon had a waiting list too long to take care of. They started hiring others, training extensively in the Maid Naturally ways, and have now over 100 clients that they clean for on a regular basis. They started producing their own cleaning products in January of 2007 because the ones they were using were not quite what they wanted. Clients were happy with the cleanings and amazed at how their homes smelled. They began asking about their products and wanting to buy them.

The company is experiencing tremendous growth and now has their products in all Yoke's supermarkets, the Rosauer's on 29th and the Y, Huckleberries and Eco Depot. Maid Naturally is a line of all natural cleaners that honor the environment and your family. Used by professional cleaners and mothers alike. Our products are Eco Friendly designed with the future in mind.
